Bring accuracy & speed to your dental treatment

Revolutionizing Dental Care

3D INTRAORAL SCANNER

Dr. Imran's Multispeciality Clinic is proud to offer 3D intraoral scanning - a cutting edge technology that brings comfort, accuracy, and speed to your dental visits. Instead of traditional messy impressions, a small handheld scanner captures detailed 3D images of your teeth and gums within minutes. This digital model allows for precise treatment planning, whether you're getting crowns, bridges, aligners, or other restorations.

Benefits For You:

- Comfortable and non-invasive
- Faster and more accurate results
- Better-fitting dental appliances
- Digital records for easy future reference

3D scanning is a key part of modern digital dentistry, helping us provide you with the highest quality care in the most comfortable way possible.

Precise Treatment Planning

Save your teeth

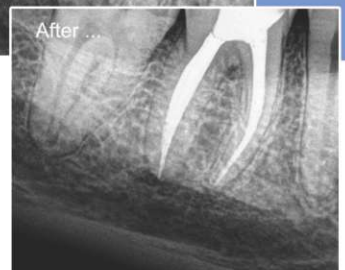

ROOT CANAL TREATMENT

Root canal treatment has become one of the most common dental procedures. A root canal is a procedure that removes the pulp and nerve tissue from the tooth. After the pulp and nerve are removed, the endodontist fills the canals and seals the access hole.

Signs & Symptoms:

- Severe tooth pain, especially when chewing or biting
- Lingering sensitivity to hot or cold
- Discoloration of the tooth
- Swelling and tenderness in the gums
- Formation of a pimple-like bump on the gums

DENTAL SERVICES
Restorative Treatment

Restore damaged teeth

TEETH FILLING

Teeth fillings are a common dental procedure used to restore teeth that have been damaged by decay, cracks, or fractures. They help to prevent further damage, protect the sensitive inner tooth pulp, and improve the appearance of your smile.

At Dr. Imran's Multispeciality Dental & Aesthetic Clinic, we understand the importance of a healthy and beautiful smile.

We offer a wide range of restorative dentistry services, including tooth fillings, to help you achieve and maintain oral health while enhancing your smile.

DENTAL SERVICES
Restorative Treatment

Revitalize your smile

TEETH WHITENING

Discover the Brighter, Whiter, and Confident You. We use peroxide gels to brighten and whiten your teeth. Our treatments are safe & effective, and can give you the pearly whites you've always wanted.

■ Stained or Discolored Teeth

If your teeth are stained from factors like coffee, tea, or tobacco use, teeth whitening can effectively reduce and eliminate these stains.

■ Yellowing Due to Aging

As we age, our teeth naturally tend to yellow. Teeth whitening can reverse the effects of aging.

■ Healthy Teeth and Gums

Teeth whitening is essential to address any underlying oral health issues before pursuing this cosmetic treatment.

Cosmetic Procedures

Revitalize your smile

VENEERS

Veneers are a custom-made shell of porcelain that covers your existing teeth to improve your appearance. They are an excellent option for teeth that are stained, chipped, crooked or irregularly shaped.

■ Stain Resistance

If your teeth are prone to staining or discoloration, veneers provide a stain-resistant surface, helping you maintain a brighter and whiter smile over time.

■ Minor Alignment Issues

For individuals with minor misalignments or irregularities in tooth shape, veneers offer a pain free way to achieve a balanced smile.

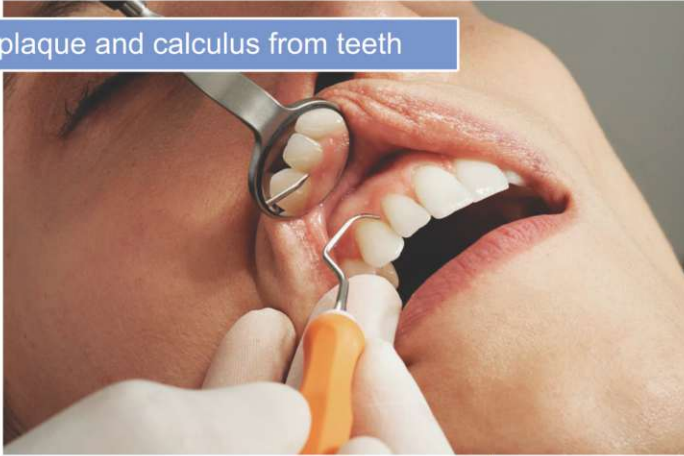

■ Chipped or Worn Teeth

Veneers are an optimal solution for restoring the appearance of chipped or worn teeth, providing a durable and aesthetically pleasing covering.

Cosmetic Procedures

Remove plaque and calculus from teeth

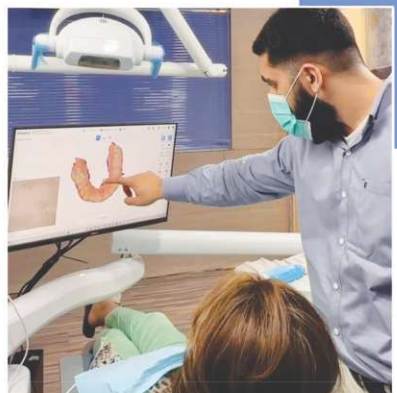

CURETTAGE

Curettage is a dental procedure used to remove plaque and calculus (tartar) from the surface of teeth and beneath the gums. It's primarily used to treat gum disease (periodontitis) and is often performed in conjunction with scaling and root planing.

■ When is Curettage needed?

- Gums that are red, swollen, and tender
- Bleeding gums when brushing or flossing
- Receding gums
- Loose teeth
- Pus between the teeth & gums

Periodontal Treatments

Restore your smile and regain functionality

REMOVABLE PARTIAL DENTURES

Removable partial dentures are one of the least invasive dental procedures for replacing missing teeth. If you have gaps in your smile due to tooth loss, partial dentures can restore both function and aesthetics. These custom-made dentures are designed to fit perfectly in your mouth and can be easily removed for cleaning, ensuring convenience and hygiene.

At the best dental clinic in Lahore, led by the best dentist in Lahore, we specialize in providing personalized solutions such as affordable dentures, tooth replacement options, and cosmetic dentistry to help you regain your confidence and smile beautifully.

■ Advantages:

- Cost-Effective Tooth Replacement
- Flexibility in Treatment
- Ease of Maintenance
- Non-Invasive Treatment

Prosthodontic Treatments

Revitalize appearance of missing teeth

DENTAL BRIDGES

Excellence in Restorative Dentistry for a Beautiful and Functional Smile.

Dental bridges are an excellent solution for restoring the function and appearance of missing teeth. This procedure involves placing an artificial tooth, securely cemented in place with support from neighboring teeth. Not only does it prevent your remaining teeth from shifting and affecting your bite, but it also helps reduce the risk of bone loss in the jawbone. At the best dental clinic in Lahore, you can expect expert care and precision in every treatment, ensuring a beautiful and functional smile that lasts.

■ Who is a Candidate for Dental Bridges?

Dental bridges are a good option for people who are missing one or more teeth and have healthy teeth and gums. They are not a good option for people who have severe gum disease or who are not able to undergo dental surgery.

■ The Dental Bridge Procedure:

The dental bridge procedure typically takes two or three appointments. During the first appointment, your dentist will prepare the abutment teeth by removing some tooth enamel. They will then take impressions of your teeth and send them to a dental lab, where the bridge will be custom-made. During the second appointment, your dentist will cement the bridge in place.

Restore the missing tooth

DENTAL IMPLANTS

Missing teeth can be a source of embarrassment and discomfort, affecting your smile, confidence, and even your ability to eat and speak properly. But no worries, we offer dental implants at Dr. Imran's Multispeciality Dental Care (DIMDC) to give you the best dental and aesthetic experience in DHA Lahore.

■ What is a Dental Implant?

A dental implant is a small titanium post surgically placed into the jawbone to replace the root of a missing tooth. It serves as a strong foundation for a crown, bridge, or denture.

■ Who Is a Good Candidate?

Ideal candidates are individuals with good oral and overall health, sufficient bone density in the jaw, and no active gum disease. A consultation and imaging help determine suitability.

■ Procedure:

1. Consultation & Planning: X-rays and scans are used to plan the implant placement.
2. Implant Placement: The implant is surgically inserted into the jawbone.
3. Healing & Osseointegration: Over a few months, the implant fuses with the bone.
4. Abutment & Crown: Once healed, an abutment is attached, followed by a custom-made crown.

■ Benefits of Dental Implants

Implants look, feel & function like natural teeth. They preserve bone, maintain facial structure, and improve chewing & speech.

■ Caring for Your Implant

Good oral hygiene, regular dental checkups, and avoiding tobacco are essential for the long-term success of your implant.

Periodontal Treatments

Restore your smile and regain functionality

DENTURES

Missing teeth can significantly impact your smile, confidence, and oral health. We offer missing teeth dentistry at Dr. Imran's Multispeciality Dental Care DHA Lahore. It's a reliable and affordable option for restoring your smile and regaining functionality.

Whether you're missing a few teeth or all of them, dentures can provide a natural-looking and comfortable solution. Dentures are removable replacements for missing teeth. They are made from a base of acrylic resin and artificial teeth that are custom-designed to fit your mouth and match the appearance of your natural teeth.

■ Consultation:

We will examine your mouth and teeth to determine if you are a good candidate for dentures. We will also discuss your options and take impressions of your teeth and gums.

■ Fittings:

Our team create a custom-made denture based on the impressions of your mouth. You will have several fittings to ensure the denture fits properly and feels comfortable.

■ Placement:

Once the denture is complete, We will place it in your mouth and adjust it as needed.

BRACES & ALIGNERS

Tired of misaligned teeth affecting your smile and confidence? Dr. Imran's Multispeciality Dental Care offers a range of affordable and effective braces and aligner options to help you achieve the smile you've always dreamed of.

■ Metal Braces

The traditional and proven option for effective teeth alignment at an affordable cost.

■ Ceramic Braces

Similar to metal braces, but with tooth-colored brackets for a more discreet appearance.

■ Lingual Braces

Invisible braces placed behind your teeth, ideal for patients seeking the most discreet option.

■ Clear Aligners/Invisalign

Removable and virtually invisible aligners for a comfortable and convenient treatment experience.

DENTAL CROWNS

A dental crown, also known as a “cap,” is a tooth-shaped covering that fits over your existing tooth to restore its shape, size, strength, and appearance. Crowns are a versatile and durable solution for a variety of dental problems, including:

- Broken or cracked teeth
- Severely decayed teeth
- Teeth that have been weakened by large fillings
- Discolored or misshapen teeth
- Teeth that have undergone root canal treatment
